MILL SPARES AND SITE
SERVICES TO THE
SOUTHERN AFRICAN
MINING INDUSTRY

PROUDLY LEVEL 1 B-BBEE CONTRIBUTOR

OUR SERVICES

NCP Africa is a supplier of new and refurbished mill solutions including quality mill spares & critical mill services to the Southern African Mining Industry. Our site services incorporate sitebased mill condition assessments, disassembly of nominated mill equipment and replacement thereof, as well as installation and mill recommissioning. Our expertise and proven track record enables us to refurbish existing components or re-engineering new component supply for any mill.

OUR TEAM

NCP Africa's greatest assets are the experienced and professional members of our team who are driven and dedicated to offer and deliver successful solutions to our customers with full aftersales support. We have a locally based design office and access to South Africa's largest engineering workshops. As part of the NCP Group, we are a recognised mill OEM and can confirm that all of our work carries OEM equivalent warranties that are backed by a highly experienced team of professionals waiting to service you.

WE CAN HELP

NCP Africa offers the latest generation, proven technology to improve our clients Opex. NCP continues to go the extra mile for every client in the most efficient and cost-effective ways, making sure we stay true to our mission statement of delivering world-leading quality products and surpassing our client's expectations. NCP Africa is proudly a Level 1 B-BBEE contributor in South Africa and aims to be your preferred mill support partner, whatever your requirements.
